Vishwa Gaurav Shukla - Frontend Developer

+91 8887924395 | linkedin.com/in/vgs-profile | vgsofficial0707@gmail.com

Front-End Developer with expertise in modern day front-end techstack, focused on building scalable, high-performance and scalable applications. Experienced in AI integration, SSO across microservices, and modernizing legacy systems. Strong problem-solving skills backed by DSA knowledge and a track record of leading teams, enforcing best practices, and delivering optimized user experiences.

EXPERIENCE

Associate Software Developer - 98th Percentile Pvt. Ltd. *Mar 24 - Present*

- **LLM-Powered AI Integration:** Integrated frontend support for LLM-enhanced features built on the backend, enabling users to generate and refine data contextually. Implemented dynamic, high-performance modals based on input conditions for improved UX.
- **Modernized Legacy Apps:** Led the revamp of two legacy CRA-based apps, migrating to Vite, TypeScript, Redux Toolkit, and React Bootstrap, significantly improving maintainability and reducing bugs.
- **Technical Leadership:** Guided a team of 8 developers, maintained code quality through reviews, and established best practices to prevent pre-merge issues.
- **SSO & Micro-Frontend Integration:** Implemented Single Sign-On (SSO) across microservices, enabling unified authentication and seamless cross-app navigation.
- **Strategic Planning:** Contributed to MVP planning, UX flows, and architectural decisions aligned with technical and business goals.
- **Event Management App:** Developed a responsive event platform using ReactJS, Redux Toolkit, Bootstrap, and Vite, supporting real-time scheduling and secure user access.
- **Student & Teacher Dashboard:** Built responsive dashboards for test management using ReactJS, Redux Toolkit, Socket.io, and Bootstrap. Integrated real-time updates and JWT-based authentication for secure, role-based access using CMS data.
- **B2B Content Management System:** Developed the frontend using ReactJS, Redux Toolkit, and Bootstrap, with optimized state management and prop handling for smooth and efficient performance.

Trainee Software Developer - 98th Percentile Pvt. Ltd. *Dec 2023 - Mar 2024*

- **Backend Development (Laravel):** Contributed to backend functionality using Laravel and MySQL for efficient data handling. Enhanced UX with interactive features using jQuery and JavaScript, and collaborated with the team to improve performance and stability.

Technical Skills

- **Languages:** JavaScript, TypeScript, Java
- **Frameworks/Libraries:** ReactJS, Redux Toolkit, Bootstrap, Socket.io
- **Tools:** Git, VSCode, Postman
- **Databases:** MySQL, MongoDB
- **Authentication:** JWT, SSO
- **Other**: REST APIs, Agile, GitHub, LLM Integration (AI)

EDUCATION

Bachelor of Technology - *Aug 2019 - Jun 2023*

Ajay Kumar Garg Engineering College, Ghaziabad
